Professional Summary

DevOps and Cloud Engineer with hands-on experience building serverless and containerized systems on AWS. Skilled in CI/CD automation, infrastructure design, Linux system administration, and system-level debugging, with practical exposure to Kubernetes and troubleshooting across distributed environments.

Technical Skills

Cloud Platforms:	AWS (EC2, Lambda, API Gateway, S3, IAM, CloudWatch, CloudTrail)
Systems & Administration:	Linux Administration, System Monitoring, Troubleshooting, Log Analysis, Shell Scripting
Networking & Infrastructure:	Networking Fundamentals, DNS, HTTP/HTTPS, Virtualization Concepts, Infrastructure Operations
DevOps & Tools:	Docker, Kubernetes, Jenkins, Git, GitHub, CI/CD Pipelines
Programming/Scripting:	Bash, Python
Support & Operations:	Cloud Monitoring, Incident Response, Monitoring Alerts, Root Cause Analysis, Documentation, Debugging Workflows

Projects

Serverless EC2 Monitor & Control Dashboard	2025
AWS Lambda, API Gateway, DynamoDB, SES, S3	
- Built a serverless cloud monitoring solution to monitor EC2 instances and automate operational workflows. - Implemented event-driven automation to identify idle compute resources and execute corrective actions automatically. - Configured AWS-based monitoring, alerting, and scalable infrastructure workflows to improve observability, reliability, optimum response time and operational availability. - Documented deployment architecture, workflows, and operational processes as part of published research work.	

Volunteer Experience

Open Source Community Volunteer Contributor	Jun 2017 – Present
Android Open Source and Custom ROM Communities	
- Assisted in testing, validation, and troubleshooting of Android custom operating system builds across multiple devices. - Investigated system-level issues, crashes, and performance bottlenecks using diagnostic logs and debugging tools. - Collaborated with distributed developer communities to reproduce bugs, improve system stability, and support issue resolution workflows. - Worked with recovery, flashing, and restoration utilities while documenting testing observations and troubleshooting steps.	

Education

Master of Computer Applications (MCA)	2024 – Present
Jain (Deemed-to-be University), Bengaluru	
Specialization: Storage & Cloud Technology (Major), AI & ML (Minor)	
Bachelor of Computer Applications (BCA)	2021 – 2024
Chandigarh University, Mohali	

Certifications

- Ethical Hacking – National Institute of Electronics and Information Technology (NIELIT)
- Introduction to Industry 4.0 and Industrial Internet of Things – NIELIT, IIT Kharagpur

Publication

Published Research Paper: Build a Serverless EC2 Monitor & Control Dashboard with AWS Lambda, API Gateway, and S3
International Journal of Innovative Research in Science, Engineering and Technology (IJIRSET), 2025
